

Notes to tablesTable 4/11

Table 4/11 is based largely ^{on} Table 55 in the General Report for 1961 and on Table 66 in the General Report for 1951.

Table 66 (PART) Economically active males by social class (thousands)

Year	I	II	III	IV	V	Total
1931	289	1703	6484	2417	2355	13247
1951*	439	1927	7398	2250	2046	14060
1951	452	2010	7513	2272	1816	14064

* classified according to the 1931 classification scheme.

Source: General Register Office, 1951 Census, Great Britain, General Report, p147

Table 55 (PART) Economically active males by social class (thousands)

Year	I	II	III	IV	V	Total [‡]
1951	✓ 452	2010	7513	2272	1816	✓ 14063
1961*	659 ✓	2408 ✓	7843 ✓	1963 ✓	1777 ✓	14649
1961	569 ✓	2103 ✓	7293	2909 ✓	1257 ✓	14649

131

* classified according to the 1951 classification scheme.

Source: General Register Office, 1961 Census, Great Britain, General Report, p193

[‡] unclassified in 1961, 518 about 3.5%.

1. The percentage of economically active males was calculated for each row in both tables.

Year #	I	II	III	IV	V	Total.
1931	2.2	12.9	48.9	18.2	17.8	100.0
1951 *	3.1	13.7	52.6	16.0	14.6	100.0
1951	3.2	14.3	53.4	16.2	12.9	100.0
1961 #	4.5	16.4	53.5	13.4	12.1	100.0
1961	4.0	14.9 14.9	51.6	20.5	8.9	100.0
1966 **	4.5	15.7	50.3	20.6	8.8	100.0

* classified as ~~the class~~ using the scheme of that year unless otherwise stated.

* classified according to the 1931 classification scheme.

classified according to the 1951 classification scheme.

** classified according to the 1961 classification scheme.

due to classification

2. The sum difference₂ for each class was then calculated. ~~for each~~

change.	II I	II	III	IV	V
1931-51	+0.1	+0.6	+0.8	+0.2	-1.7
1951-61	-0.5	0.5 -1.5	-1.9	+7.1	-3.2
1931-61	-0.4	-0.9	-1.1	+7.3	-4.9

3. For each social class the change was added to the corresponding year.

~~Figures in previous table therefore reads:~~

Year					
1931	$2.2 + (-0.4)$	$12.9 + (-0.9)$	$48.9 + (-1.1)$	$18.2 + 7.3$	$17.8 + (-4.9)$
1951	$3.2 + (-0.5)$	$14.3 + (-1.5)$	$53.4 + (-1.9)$	$16.2 + 7.1$	$12.9 + (-3.2)$
1961	4.0	14.9	51.6	20.5	8.9
1966	4.5	15.7	50.3	20.6	8.8

Table 4/11. Percentage of economically active males in each social class based on the 1960 classification of occupation

Year	I	II	III	IV	V	Total
1931	1.8	12.0	47.8	25.5	12.9	100.0
1951	2.7	12.8	51.5	23.3	9.7	100.0
1961	4.0	14.9	51.6	20.5	8.9	100.0
1966	4.5	15.7	50.3	20.6	8.8	100.0

Table 13/9.

In table 13/9 the same procedure was adopted except the table was confined to changes which took place between 1951 and 1966. However the calculations had to be done for each age group in each year. The percentage by age group in the five social classes was first calculated according to classification scheme used in the year of ^{census.} ~~survey.~~ The weighting operation was then performed on each cell. Since the proportion in each age group affected by classification schemes are ^{deviates from the mean change} likely to differ the results must be treated as only very approximate.

Table 13/10

Table 13/10 is derived from table 13/9 using different age groups. The same qualifications about method are appropriate.

Table 13/11

A = for table 13/10.

Table 3b. gives more detailed information on recent trends among economically active and inactive persons in the population.
