Hazel

I am borrowing through some material left by Tim on low pay. Early on, you completed a table for the poverty survey on deciles. Tim and I compared this with the New Earnings Survey & the Family Exp. Survey and concluded that we should produce a better version to improve comparability. I can find no trace of this new version.

If you could contemplate the exercise could I ask for the following?

1. Full-time last week ie 30+ hours, men 21+ over, women 18+ over
2. Britain only (the NES & FES don't include N. Ireland)
- 3.
